MESSAGE FROM THE CHAIRMAN

Dr. Amit Gupta
Chairman (Chancellor)

“ At the outset I would like to congratulate the Editorial Team for bringing out an excellent newsletter for information of students, faculty and staff of Jagannath University. A newsletter is not only a medium for disseminating information about diverse events taking place in the organisation but during challenging times such as the Covid Pandemic it serves as a potent instrument for shaping opinion, perspective and debate within the community on important cultural and social issues impacting its members.

As we move into the new year I am confident that our Management and teaching staff will once again exhibit a high degree of adaptability and resilience in facing the challenges posed by the resurgence of covid all over the country

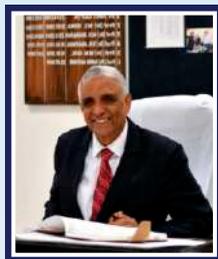

Digital learning is leading the charge as a mainstay and many new trends are picking up momentum across the globe. Multidisciplinary and modular pedagogy that offers transferable skills and customized learning will succeed and post-pandemic times could see a blend of a e-learning and mainstream face-to-face learning boosted by the ed-tech sector

The future holds immense potential for university graduates in today's digital scenario. As a dynamic and growth-oriented university it is critical for us to understand the external environment, such as the changing economic and political developments which impact the job market, and embark on skills development as a parallel trust area.

Once again my congratulations to the Editorial Team and best wishes to all faculty, staff and students for a happy, safe and productive 2022!

”

MESSAGE FROM THE PRESIDENT

Prof. (Dr.) H.L. Verma

President (Vice-Chancellor)

“

Dear Readers,

It is a matter of great pleasure and satisfaction that Jagannath University, Jaipur is bringing out E-Newsletter (JU Cosmos) that will showcase the events and developments of the University in recent times. The University in pursuance of its vision of developing as a Centre of Excellence of higher education with focus on quality education, skill development, industry integration and holistic eco-system for global competencies among youth is continuously working for academic expansion and diversification on both horizontal and vertical dimensions. I am sure that the newsletter will disseminate all relevant news about the latest achievements of our faculty members and students. I congratulate the Editorial Team for their initiative and wish them a great success.

The main focus of our academic system is on providing right type of education and preparing students to deal with the challenges of modern organizations characterized by complexity, diversity and change in economy. The specific emphasis of the system is on promoting interdisciplinary and multidisciplinary perspectives of learning along with the study in major subjects. Accordingly, a number of initiatives have been taken which includes Choice Based Credit System, Outcome Based Curriculum, NSDC sponsored Skill Development Centre, MoUs/Partnerships with industrial organizations for internships and placements, Career Guidance and Counseling Cell, Institutional Innovation Centre, extended role of IQAC in conduction of programs, foreign collaborations for pathway programs, ICT enabled classrooms for blended mode of learning, digital library, etc. The salient features of NEP-2020 including multidisciplinary and holistic education, ethics and human values, extensive use of technology in education delivery, research activities, community services, etc. have also been incorporated in the academic system. The process for NAAC accreditation (2nd Cycle), ICAR accreditation, NIRF ranking, Recognitions and Approvals from various Councils, etc. have already been initiated. The four pillars that drive our education are quality education, skill development, holistic approach and industry integration.

The publication of this Newsletter would provide a platform for coordinated efforts of students and faculty members to strengthen the necessary connect and bonding among themselves and promote a shared vision for becoming a centre of excellence in modern context.

Let us welcome the second issue of E-Newsletter and wish for the sustainable growth and success of Jagannath University.

”

MESSAGE
FROM THE
PRO-PRESIDENT

Prof. (Dr.) Vaishali Sharma
Pro-President (Pro. Vice Chancellor)

“

I am delighted to bring greetings in this issue of the University newsletter. We have entered a new era of higher education and as an institution, we are adopting new, innovative and creative strategies and processes to ensure a sustainable, successful future. Significant events are taking place in our University, almost every week. This newsletter is a collection of all these important and interesting activities, not only the happenings but also giving way to the creative bent of both staff and students. I take this opportunity to convey my sincere thanks to every member of the University community for their active contribution in ongoing development of the University. I congratulate the editorial team for this compilation.

”

MESSAGE
FROM THE
REGISTRAR

Mr. Tanmay Pattnayak
(Registrar)

“

I wish to congratulate the University for bringing out its second issue of E-Newsletter – JU Cosmos and a warm welcome to all the stack holders. The Newsletter is a testimony to all the quality teaching, learning and other Co-Curricular accomplishments of the University. I must say it's a commendable effort that will bring quality to the columns and show case the events and talents of young stars. I am quite confident that the University will certainly develop a creative forum and the coordinated efforts of the students and faculty which will develop necessary connect and bonding in due course of time. This will provide an enormous opportunity to all the stack holders of the University to show case their talents during this stipulated period. This will provide a platform for creating an ambience for nurturing innovation, creativity and excellence particularly in our students. This will certainly project the image of the University beyond its territory. I am quite excited to read about the various activities, achievements and articles on various issues in the newsletter. Many many congratulations to the editorial team and I wish them all the best for their honest efforts.

”

GOOD TO GREAT TEACHER

The mediocre teacher...TELLS

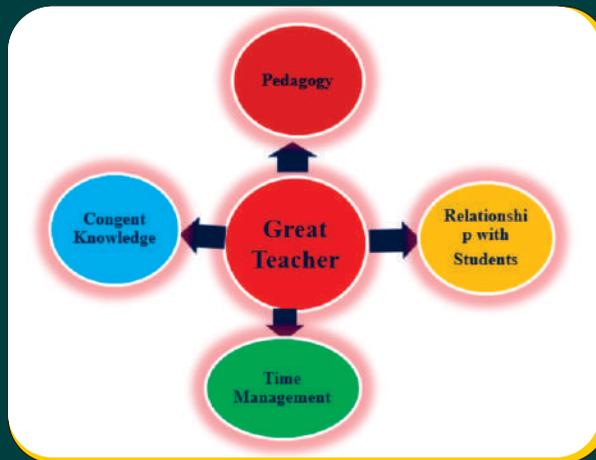

The good teacher...EXPLAINS

The superior teacher...DEMONSTRATES

The great teacher...INSPIRES

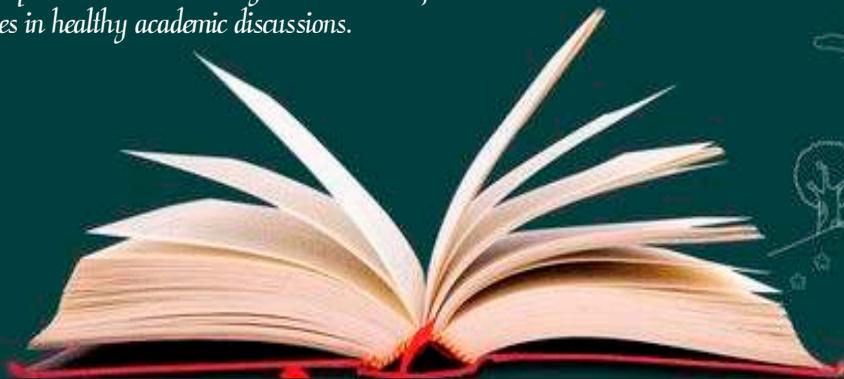

...william Arthur ward

Teaching seems to be a noble profession in our society. To justify the same, every teacher must adopt this profession willingly and must maintain utmost ethics, as teacher contributes to the career building of the students, who subsequently contribute to Nation-building. Like a sapling grows to a banyan tree gradually with proper care & ingredients, in the same way, every student needs a proper teacher in the form of a mentor, a philosopher, a friend, and above all a role model who can groom him/her to a successful professional. This is achieved through a great teacher who can ethically justify his / her profession in a very qualitative way. The following figure depicts major verticals which lead a good teacher to become great.

(A) Content Knowledge

All teachers are having content to impart teaching. However, good teachers are confined only to books or other readymade materials but great teachers are having their content beyond these and have deeper subject knowledge which helps them learn simultaneously with the teaching. They not only have to teach but also have to learn as learning is a lifetime process. They are passionate learners, learners not by compulsion but by inner will. They keep attending various National / International Seminars / Webinars / FDPs / Workshops to update themselves. They read/ write subject-related articles to enhance their research area and indulge themselves in healthy academic discussions.

(B) Pedagogy:

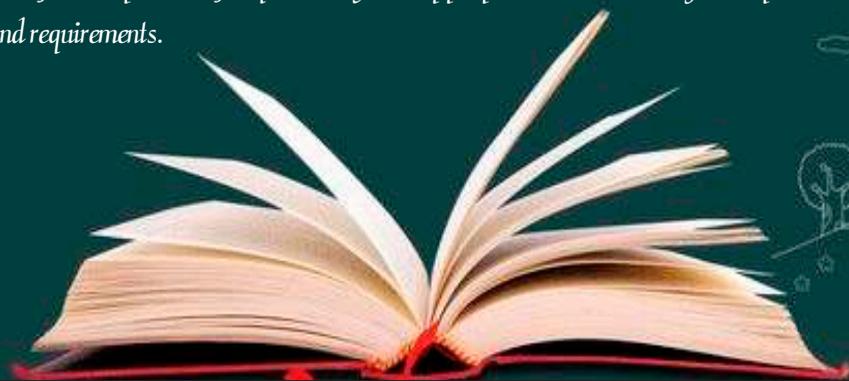

Pedagogy/ Teaching techniques are one of the important verticals to keep the teaching, learning process more effective. Normally great teachers go beyond classroom/lab to bring joy in the classroom and make the class interactive through their innovative teaching techniques. They train students to think rather than grasp since innovation is an integral part of the teaching & learning process these days, thereby giving students more opportunities for the collaborative approach which certainly brings enormous outcomes. Always use creative, conceptual, and real-life (live) approach for teaching which makes the class most interesting, interactive, and memorable. Since we are leaving in a digital era, all great teachers transform themselves to adopt new technology e.g. ERP, LMS, etc. to impart the teaching & learning process more effectively. Finally, they give more emphasis to practical knowledge since skillset is the dire need of today's era.

(C) Relationship with Student:

Great teachers focus not on compliance but more on connections and relationships. They are very much concerned for their students which creates a strong bonding between the teachers and students to get a desirable outcome. They not only hear the students rather they listen to the students and resolve their problems which subsequently makes all the students more comfortable. Always they try to understand their emotional and mental state, share informal talks (academic, non-academic) which helps them to develop a friendly relationship with each other. Great teachers show tremendous care for their students, trust in them, and in return expect great success. Great teachers show not only sympathy rather they show empathy with students, which helps the teachers understand the student's psychology better.

(C) Time Management:

All the above three facts will be failures if a teacher can't manage all these in due course of time. Time is the most precious resource for all of us. However, great teachers are utilizing the same to the best possible extent. They plan everything very meticulously like a lesson plan, assignments, pedagogy, class-test, other related materials, etc. to deliver effective and quality teaching. Always, they give more emphasis to the remedial classes for weaker section students to keep the entire class at the same level. Overall, they go by meticulous planning rather they go for effective execution of lesson plans. If required they take appropriate action to change their plans according to the student's needs and requirements.

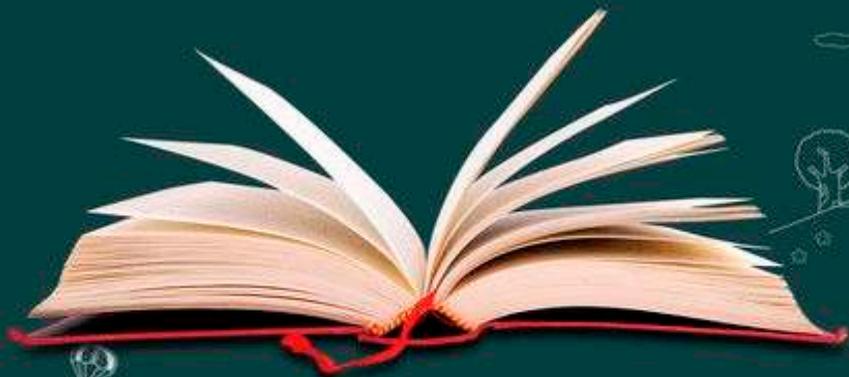

(E) Conclusion :

Finally, the above-mentioned verticals are not the ultimate verticals, but we can say that these are desirable benchmark characteristics to make a good teacher to become a great teacher in their professional journey.

According to me, every teacher must devise various unique verticals as per their knowledge & expertise for effective & quality delivery in the teaching & learning process. The ultimate objective for a great teacher should be to transform a variety of students into successful professionals and must emphasize all round personality development and also in inculcating human values and professional ethics which help the students become more humane and socially alive to lead a meaningful life.

*For all students, every class must end with a note like; “**WOW ! YAR CLASS ATTEND KARKE MAZA AAGAYA...**” So finally, I urge my teaching fraternity to work on the WOW! a factor that positively transforms a teacher not only to be a good but also to be a great teacher.*

“Our only limitations are those we set up in our minds”

Subconscious Mind plays a very important role in everyone's life. It is the most powerful weapon which leads to the way of success and happiness in our life. It plays the role of memory bank in storing the data like our beliefs, memories, previous experience and skills. Along with it, everything which can be seen or the thoughts are also stored in it. The thoughts backed by strong emotions stay in our mind. The capacity of subconscious mind is virtually unlimited. It basically obeys the command given by conscious mind. It stores all our habits of thinking and acting and accordingly memorizes our comfort zones. It says that subconscious mind is the creator of our life. So a person should always try to reprogram the subconscious mind which helps in achieving one's desired goal and success in life.

And faith plays a very important role to achieve the desired goal into our life.

Self-Talk - The power of subconscious mind can be enhanced by eliminating the thoughts which are full of negative emotions. One should have a check on the self talk. There is a need to reduce the negative self talk and for this the best practice is Counter technique. In this whenever any negative thought enters in our mind, it should be countered with extremely positive thoughts. It will build a positive mindset which will lead to achieve one's desired goal.

Burning Desire - Our subconscious mind will do anything to achieve it, if our desire is powerful and full of positive emotions.

Visualization Technique - It is a very effective technique in which, one visualizes his/her life as if the desire is already fulfilled.

In all these techniques, love, energy and faith play a very important role to achieve the desired goal into our life.

Being yourself, "Never let the kid in you die"

We all are perfect in an imperfect way
And no one decides what I say
I will be the One who lives in wild
And will not let die my inner child
The child who is one of a kind
And to him the world is blind
Because the world don't want to give him a chance
To be the kind of beauty inside he wants
If you'll understand him you will find him pure
You will love him for what he is for sure

"Three Dimensions of a Learner"

Education is a process which converts empty brain to untie brain so that learners can think in every dimension and provides knowledge, values and different skills to the individuals and play an important role in the country's economy and development of society. Education is received through formal process whereas learning is received through informal process which is a life time process. A learner should have these three dimensions or qualities viz. Curiosity, Concentration and Endurance. A learner should have curiosity; this is the first dimension of learners. To pacify the curiosity one has to use the concentration which is a second dimension. Without curiosity, concentration cannot be applied and in this whole process, one has to make patience as her/his partner and this will be the third dimension of a learner. It is the duty of the teacher to pacify the curiosity of the students with her/his knowledge.

- Dr. Anil Kumar Sharma
Dean Academics

Sustainability through Informal Economy

The informal economy provides a living for the bulk of the world's urban population. In some nations, this figure might reach as high as 80% of the working population. One of the greatest numbers of such population is in India. The main factor is that many countries' formal economies are unable to provide adequate jobs for the majority of their citizens. As a result, they find alternative means of supporting themselves and their family. Many of them also sell items and services that are used by both the middle and lower classes in the city. The flexibility of the informal economy to adapt its products to meet the desires of the wealthy and the limits of the poor is hence its driving force.

Informal economy workers in cities frequently occupy the most remote regions, such as riverbanks, which are particularly vulnerable to climate change. But where would they go if someone started eliminating them from these locations? They've developed a social network in their current location, relying on metropolitan groups for supplies and care. This is a type of social insurance, that is void if these folks are simply relocated. It's critical to protect them in their current habitats, and if relocation is unavoidable due to climate change, to do it with care.

Remote Working – New Normal

As we all know, from the last approx 2 years the entire world is suffering from COVID-19 pandemic and INDIA is not an exception as well. We have never encountered such a challenging situation in our life ever as this pandemic came after 100 years. The situation was even worst when life was in Lockdown and limited access after lockdown. In this period, we all were started thinking in multiple dimensions and worried about our career, jobs, child's education etc.. The situation is little better now, but again there is downfall due to new COVID-19 variants.

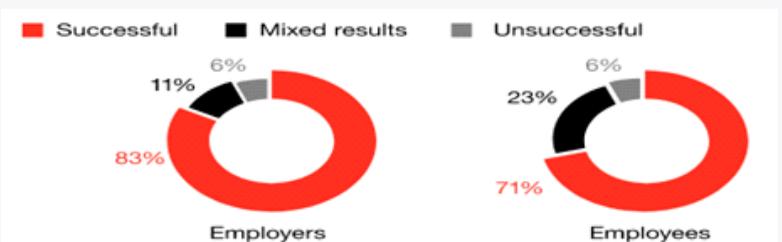

With all these challenges new opportunities came and almost all the industries started thinking to challenge this unprecedented situation. Since we are living in the Era of technology where things are changing dynamically & evolving with the time and making our life's journey much smoother & easy and in this pandemic period too technology played a vital role.

Industries setup their infrastructure on large scale so that employees could start working from home without impacting the productivity and business. Here onwards, we have started hearing the term “**REMOTE WORKING**” in various ways like working from home, online classes, online exams, remote support etc... Many industries has accepted the new work culture and gave long term work from home to their employees like Google, Facebook etc... Even in education, we have heard about many online platforms (UpGrad, BYJU's, Unacademy...) which are well established in this pandemic period and running the online classes across all standards.

Various studies shows that INDIA has well accepted the new work culture and many industries will keep continuing to do the same in the future as well.

By the end of 2021, **51%** of all knowledge workers worldwide are expected to be working remotely, up from **27%** of knowledge workers in 2019, according to Gartner, Inc.

Remote work has been a success

Important Planets in Astrology for Higher Education

Perhaps one of the most crucial aspects of our lives is education or Vidya. Every parent is interested in learning more about their child's education. So, let's look at how we might deduce education prospects from a birth chart.

Astrology is the only subject on the planet that can foretell a child's scholastic future, including the branch he or she will pursue.

Jupiter, Mercury, Moon-These 3 are the most important planets while judging education.

Jupiter is the planet of intelligence and knowledge. It aids in the assimilation of information obtained from numerous sources such as books, teachers, and others. We cannot acquire knowledge or attain major educational success without Jupiter's assistance. That is why Jupiter was granted the rulership over Sagittarius, the natural Zodiac's 9th house.

Mercury is the planet of quick intelligence. It gives quick grasping power. So without the help of Mercury, it will be difficult to get success in the learning process.

Moon is the signification of the mind. For getting success in study, concentration is very important. We need a focused approach and a high level of concentration for a good education.

Only Moon can provide this.

Jupiter is wisdom, knowledge and intelligence. Mercury is the grasping power. Mercury process the wisdom or knowledge of Jupiter and the moon helps in digesting that knowledge. So these three planets must be strong for a good education. The strength of Jupiter, Mercury and the moon plays a vital role here.

Branch of Education as per Planets

1. Sun signifies Science, Medicine, Chemicals, Doctors, Light, Heat, Solar and Government etc.
2. Moon signifies Marine engineering, Hotel management, Human resource, Nursing, Sales and marketing etc.
3. Mars signifies Engineering, Analysis, Research, Physics, Technology, Surgery, Power and Energy etc.
4. Mercury denotes Commerce, Astrology, Mathematics, Accounts, Finance, Logic etc. A combination of Mars and Mercury offers analysis.
5. Jupiter denotes Philosophy, Languages and Finance etc. Its combination with Sun indicates Biology, Genetics and Micro-biology etc.
6. Venus signifies Arts, Music, Dance, Chemicals, Chemistry, Perfume and Social Studies etc.
7. Saturn signifies History, Politics, Ancient Science and Mythology etc
8. Ketu signifies Medicine, Mathematics, Accounts, occult subjects etc.
9. Rahu signifies MBA, Photography, Acting etc.

शिक्षा का अधिकार : एक जागरूकता

शिक्षा एक मानव अधिकार है और अन्य सभी मानव अधिकारों की प्राप्ति के लिए आवश्यक है। यह एक बुनियादी अधिकार है जो व्यक्ति को मानवीय गरिमा के साथ जीने में मदद करता है, शिक्षा का अधिकार एक मौलिक मानवाधिकार है। प्रत्येक व्यक्ति, जाति, लिंग, राष्ट्रियता, जातीय या सामाजिक मूल, धर्म या राजनीतिक वरीयता, उम्र या विकलांगता के बावजूद, मुफ्त प्रारंभिक शिक्षा का हकदार है।

शिक्षा राष्ट्रीय विकास की आधारशिला है। शिक्षा के बिना कोई भी राष्ट्र विकसित नहीं हो सकता। शिक्षा का कार्य राष्ट्र की प्रगति और विकास को गति देना है। शिक्षा ही एक ऐसा साधन है जो राष्ट्रीय एकता लाता है। किसी राष्ट्र की शैक्षिक उपलब्धि, राष्ट्रीय गौरव का सूचक भी होती है।

पूर्व.ब्रिटिश, पाठशालाओं, गुरुकुलों, गुरुद्वारों और अन्य धार्मिक संगठनों में स्वदेशी माध्यमिक शिक्षा प्रदान की जाती थी। महिलाओं और अनुसूचित वर्गों और गरीब लोगों के लिए शिक्षा पर प्रतिबंध लगा दिया गया था।

बाद में भारत शिक्षा आयोग 1882, शिक्षा नीति पर सरकारी प्रस्ताव 1904, गोपाल कृष्ण गोखले के संकल्प 1911, हरतोग समिति 1929, वर्धा योजना 1938 और सार्जेंट रिपोर्ट 1944 जैसे कई आयोग और समितियां स्थापित की गईं। उन सभी ने मुफ्त और अनिवार्य शिक्षा पर जोर दिया।

भारत ने गुरुवार 27 अगस्त 2009 को 86वें संवैधानिक संशोधन द्वारा शिक्षा का अधिकार लागू किया। इसमें कहा गया है राज्य 6 से 14 वर्ष की आयु के सभी बच्चों को इस तरह से मुफ्त और अनिवार्य शिक्षा प्रदान करेगा जैसा कि राज्य, कानून द्वारा निर्धारित कर सकता है।

भारत सबसे पहले शिक्षा को अनिवार्य और सभी के लिए मुफ्त बनाने वाला देश है। औपचारिक शिक्षा सभी को बिना किसी लिंग, जाति, पंथ और रंग के भेदभाव के दी जाती है।

Our Parents

Life broke my father and mother on many occasions

What they could not break was their resolve

They were duped by their dearest

stabbed countless times, Literally

But they never fell, They continued Walking

And that is What I Learned from them

That ultimately it's not about Life

It's about the spirit that strings it together

That it's darkest before Dawn.

Your Parent is God's hand on your head

Your parents are your best friends

To this day, the most memorable evening of my Life

are with my parents

They may be memorable because of ugly fights that we have

But I enjoy them thoroughly

My mother is the first to know of any failure of mine

My mother is the first to know about any new mountain

that I may have Climbed.

My Parents taught me two things:

Freedom & Responsibilities

that may arise out of the good use or the misuse of the

freedom

And they never sat me down to teach me the lesson of life.

There was a Morse Code.

You had to figure out the Dots.....& Dashes-----

Parents tend to fade in the background over time

That is the nature of Life

And Children sometimes permit that to happen

DON'T.....

Make your parents relevant to your life

That is the only OXYGEN they need.

RELEVANCE...SIGNIFICANCE.....

Covid-19 Pandemic, A Breakout In Academics

Introduction :

Entire world is in perished and pain from a deadly “Virus Outbreak” which started during winters of 2019. A year of chaos and panic which will not be forgotten by any human survived. Soon enough the WHO identified this virus as a threat to mankind and declared the situation as **Global Pandemic**, a word added recently to people's dictionary.

The story didn't ends here. By the time the elite scientist and doctors found the cure of this deadly virus, it took lives in millions and left others in panic, fear and grief of losing their loved ones.

This virus outbreak hit several sectors at once like, Administration & Politics, Health Care, Economy, Transport & Communication, and Trade & Commerce, Education & Academics etc.

Conclusion :

- This global pandemic has caused several losses to the nation worldwide. The worst effected sectors were Education & Academics, Child Welfare.
- The implication was virtual class rooms have diverted small age groups toward the excessive use of gadgets and smart phones leading to the several health issues.
- This diversion toward the virtual reality has killed several skills such as, Interest towards toys and other, cognitive skills, interactive nature, decision making & problem solving capacity and social nature.

Apart from all these children of young age groups are getting less socialize with their parents and friends and losing their joy of sharing. This is dragging children to the feeling of loneliness, stress and sometimes trauma.

"Life and Challenges"

Life, a gift of God, to all creatures. It is beautiful but not always easy. Happiness and sorrow, defeat and victory, day and night are simply two faces of a coin. Similarly, it is packed with moments of success, happiness, pleasure, joy, and luxury and punctuated by defeat, failures, problems, and misery.

One cannot deny the fact that there is no gain without pain. Similarly, to achieve something in life we have to face lots of challenges, hardships, depression and frustration. Even after facing these challenges and difficulties, we have to remain positive. Difficulties take a look at the courageousness, patience, perseverance, and true character of somebody's being. Adversities and hardships make people stronger and prepare us to face the challenges of life with disposition.

Beauty lies in the eyes of the beholder. Similarly, nothing is too simple and nothing is too hard, its just the way one looks at the circumstances and reacts. One who hates difficulties and not ready to face challenges will always treat life as a bed of thorns and on other hand one who is dedicated to succeed and ready to face the challenges will always treat life as bed of roses.

To sum up, life is beautiful as roses, however, its challenges are like thorns and we have to be ready to face these challenges. The one who settles for these challenges and succeed, are those who actually see the life in its true sense. Thus, enjoy life but also be prepared to bear the pricks of pain.

Assistant Professor

POWER OF POSITIVE THOUGHTS

**Take pride in your efforts!
And believe in yourself and how far you can go!
Every day is a fresh beginning,
avert your eyes from what could have been
and have a glance at what's achievable!
As a result, stand up and play the day with enthusiasm.
to make each day a piece of artwork!
We must often lose minor battles to win the war!
It always appears difficult until it is accomplished!
Act as if your actions have an impact.
BECAUSE IT DOES!**

Municipal Solid Waste Management in Jaipur City

In India urbanization and speedy growth have resulted in a substantial increase in the generation of Municipal Solid Waste. Safe assortment, transportation, and treatment of Municipal Solid Waste are among the key problems for Indian cities. Poor Municipal Solid Waste management practices harm public health, setting, and temperature change. Asian nation presently solely treats twenty-first of Municipal Solid Waste whereas the rest disposed of in unhygienic lowland sites with no usage and treatment technologies. Governing authorities should review the present Municipal Solid Waste management practices, challenges and provides recommendations for Municipal Solid Waste Management for the town of Jaipur in Rajasthan, India.

Despite being the urban center moreover because the high traveler destination in northern a part of Asian nation, there's no elaborate study that reviews the waste management ways of this town together with characteristic the key challenges. Recommendations for improvement embody public awareness campaigns, public-private partnerships, investment in lined landfills, usage, and waste-to-energy techniques. Optimization models and life cycle assessment tools ought to be used to reduce price and also the environmental impact of Municipal Solid Waste management. Policy manufacturers and personal sector stakeholders have to develop ways for future designing, investment, and execution of improved Municipal Solid Waste Management in Indian cities like Jaipur.

Assistant Professor

China's Territorial Claim On Arunachal Pradesh

China's territorial claim on the Indian state of Arunachal Pradesh has been a major bone of contention between India and China. China bases its claim on the argument that historical ties existed between the Tawang monastery in Arunachal Pradesh and the Lhasa monastery. Hence, the Chinese logic is that given Tibet is now part of China, Arunachal Pradesh should form a part of it. Both countries fought a border war in Arunachal Pradesh in 1962 and the situation remains unpleasant due to repeated Chinese foreign office statements reiterating the claim. The Chinese territorial claim on Arunachal Pradesh has increasingly become an issue of grave concern for Indian foreign policy given China's visible assertiveness on the issue in recent years.

Indian concerns about China's military modernization in Tibet which borders Arunachal Pradesh are also growing. China has upgraded its military presence in Tibet very close to the Line of Actual Control (LAC) in Arunachal Pradesh by replacing its old liquid-fueled, nuclear-capable CSS-3 intermediate-range ballistic missile with "more advanced CSS-5 MRBMs". India has responded to this Chinese military build-up by taking a strategic decision in October 2011 to deploy the Brahmos supersonic cruise missile, which has a flight range of 290 km, in the eastern sector to strengthen its defense posture vis-à-vis China.

China's territorial claim on Arunachal Pradesh also has great symbolic resonance for its legitimacy over Tibet. The 400 years old monastery in Tawang was the birthplace of the sixth Dalai Lama in the 17th century and is the second-largest Tibetan monastery after Lhasa. It is plausible that the 14th Dalai Lama chooses his successor from the Tawang monastery. China also perceives that India makes it possible for the Dalai Lama to travel abroad, and his speeches around the world have kept the Tibetan issue alive and questioned Chinese legitimacy over Tibet.

Drivers of Uncertainty

Driver 1: Chinese Regime Stability and Nationalism

Driver 2: The Tibet Factor

Driver 3: Internal Developments in Arunachal Pradesh

How can India tackle Chinese aggression?

A few things that India can do or should have done to strangle China are:

1) Construct an international road from North East to Vietnam. This will have multiple benefits: a) India will have direct access to the vicinity of the Hainan naval base; it is the most important naval base of China. India can directly attack the Hainan base from Vietnam if required. b) All the cheap plastic items that we import from China can be now imported from Vietnam. They manufacture the same goods at the same rate. c) Connect Singapore to India via the Vietnam NE corridor. A hell of a lot of business can be done. Malacca Strait is on the tip of Singapore and a lot of goods can be transported by road. d) The under-developed North East India will also develop with the international road passing through it.

2) India should collaborate with all the smaller islands which fall on the trade route in the Indian Ocean. Eg, The Cocos island in the Indian ocean; India still doesn't have a military base there. That island belongs to Australia, so India can easily build a base.

3) Try to remove the Chinese naval base from Hambantota, Sri Lanka, and construct India's base as the current government in Sri Lanka is pro-India.

4) India should take the advantage of the instability in Yemen and build a base in Socotra Island with the help of the US.

अब केवल माँ की गोद और कब्र ही सुरक्षित

अभी हालही में समाचार-पत्रों में एक खबर ने मुझे बुरी तरह झकझोर कर रख दिया। जिसमें समाज के कुकृत्यों से व्यथित एक युवती ने यहाँ तक कह डाला कि "अब केवल माँ की गोद और कब्र ही सुरक्षित रह गई है।" इस खबर को पढ़कर मैं यह सोचने को मजबूर हो गया कि वो कैसे विकट हालात रहे होंगे? जिससे यह युवती इतना हृदयविदारक कथन कहने को मजबूर हो गई तथा अब वह ताउम्र इस समाज से खौफ़ तथा घृणा में अपना शेष जीवन गुजारने के लिए विवश है। लेकिन इस युवती ने निश्चित रूप से समाज को वास्तविक आईना दिखा दिया है।

आज वर्तमान समय में समाज की स्थिति ऐसी हो गई है कि हमारी बालाएं तथा स्त्रियाँ ना तो घर पर ही सुरक्षित हैं और ना घर के बाहर ही। लगभग प्रतिदिन हमें छेड़छाड़, हिंसा, बलात्कार, आदि की घटनाएं सुनने या पढ़ने को मिलती हैं और इसकी निरंतरता एक विचारणीय विषय है। समाज में कुछ समाजविरोधी लोगों का व्यवहार पशुतापूर्ण हो गया है। ये ऐसे कुण्ठित लोग हैं जो अब समाज के लिए अभिशाप बन गये हैं। इन्होंने पूरे समाज के शांतिमय तथा सुखमय जीवन को अव्यवस्थित कर दिया है। स्त्रियों के अतिरिक्त नन्ही बच्चियों के साथ भी अनैतिक कृत्य होना अत्यंत दुखदायी है। आज ये अपराधी ऐसे कृत्य करने लगे हैं जिसे देखकर जंगली पशु भी शर्मसार हो जायें और ये लोग खुलेआम हमारे समाज में विचरण कर रहे हैं, जिन्हें पहचानना अतिदुश्कर कार्य है। ऐसे अपराधियों की मानसिकता को जानकर उसे शीघ्रातिशीघ्र परिवर्तित करना समय की जरूरत है, जिससे कि ऐसी आपराधिक भावना निकट भविष्य में लोगों में ना पनप सके।

इन अपराधों के घटित होने के पीछे अदृश्य कारणों पर यदि हम विचार करें तो पायेंगे कि संयुक्त परिवारों में बिखराव, अकर्मण्यता, बेरोजगारी, असंतोष, भौतिकवादी दृष्टिकोण, आदि इसके मूल कारण हैं। व्यक्तियों में आपसी मिलन, समरसता तथा सहयोग का स्थान अब एकाकी जीवन, स्वार्थता तथा मौकापरस्ती ने ले लिया है। आजकल यदि कोई पड़ोसी, अपने पड़ोसी का नाम जानता हो तो ये भी बड़ी बात हो गई है। रही सही कसर मोबाईल फोन और सोशल मीडिया पर आधारित जीवनशैली ने पूर्ण कर दी है। लोगों ने आपस में दूरियाँ बना ली हैं। 'वसुदेव कुटुम्बकम्' का स्थान, 'मैं और मेरा परिवार' के बाद अब 'केवल मैं ही (स्वार्थता की पराकाष्ठा)' ने ले लिया है। कहने को आज का जीवन सोशल मीडिया पर आधारित है परंतु इसके अतिउपयोग ने लोगों को अपने स्वयं के परिवार से ही नहीं अपितु समाज से भी पूर्णतया विमुख कर दिया है। लोग अब अपने में ही सिमट के रह गये हैं।

अतः उक्त घटनाएं पुनः घटित न हो इसके लिए बच्चों को बाल्यकाल से ही सुसंस्कारित कर उनका चरित्र निर्माण करना होगा। उनके खान-पान तथा जीवनशैली में भी सुधार की अत्यंत गुंजाइश है। उन्हें समय की महत्ता से अवगत करना होगा। उनमें करुणा, विनम्रता, स्वावलम्बीता, परहित, सहयोग तथा देशभक्तिके भाव जागृत करना परमावश्यक है। इसके साथ ही साथ हमें हमारे प्राचीन वैदिक कालीन शिक्षा पाठ्यक्रम को अपनाकर उसे हमारी आधुनिक शिक्षा में स्थान देना होगा और इन दोनों में सामंजस्य स्थापित करना होगा। इससे आने वाले समय में हमें इसके सुखद परिणाम देखने को मिलेंगे।

“AWAY FROM CLASSROOM”

The life of today's children seems to be bound inside books only. It's true because our children have been reading and being fought from morning to evening including their home tuitions, homework and many more. It is a fact that in our so-called western style of educating our kids, we put stashes of curricular activities on the shoulders of our children which can provide some sort of resistance in the development of one's personality.

Co-curricular activities refer to those activities which are undertaken side by side with curricular activities. These activities essentially take place outside a typical pen and pencil classroom experiment. It allows the students to develop particular skills and exhibit their non-academic abilities. These might include activities like debate, music, dance, drama, etc.

No doubt that the intellectual development of the personality is achieved in the classroom itself but development like character building, physical growth, creativity, spiritual and moral values are backed up by co-curricular activities only. These activities guide students on how to organize and present activities, how to develop skills, how to co-operate and co-ordinate in different situations which further help to develop leadership qualities. All of us want to make our children knowledgeable men and women of the future and creators of the nation's destiny. So we must play a positive role and give them a place to stand in the ground. These all will provide them opportunities for exposing themselves in front of their competitors and will support the nation establish its creativities to the international level.

Modernization or Dilapidation

Today, when we look around we see the beauty of modernization and elaborately, the process of modern industrialization. But the question that remains unanswered is, does this modernization keeps up with what it promises, or there is some other way where this modernization is a dilapidation phenomenon? There is a remarkable contrast between the two words, modernization and westernization. In most of the Asian countries, including India modernization means following and adopting the good and bad deeds of the western countries, predominately America which we call as westernization. After each passing day, one person is diving into this phenomenal change, leaving behind his culture, custom and even his respect and behavior. Though the numbers are roughly accurate but the truth is where it all lies, i.e westernization. In today's world where people are continuously shifting, not only their personality but also their cultural customs and rituals in accordance to what they seek from the western world, the matter of cultural and ancient knowledge remains at the top of concern. Just by having one sight rotated at the angle of 360 degrees, every single person can notice the change, the change which is more harmless and less valuable. The only important words that conclude the whole article are about the fact that in due course of modernization the need to adopt the western culture and civilization tactics by avoiding our traditions, is almost nil. A thorough understanding of the history of respective cultural traditions and rituals of the respective country in which you reside, not only gives you a whole new experiences but also increases your overall knowledge, enhances your behavior, and in some cases, increases your patriotism towards your country.

Life at Jagan Nath University

When I was thinking to join the University I have decided for sure to explore so many things like playing cricket, painting, content writing, and participating in every event even if I had no idea of it. This would take my motivation to its highest level and I will be enjoying college life and gather lot of memories. My parents and my friend Kundan played a vital role in recovering my potential and also motivated me to innovate my life while joining the MBA program.

I have participated in various events of the University and secured second position and was awarded with prizes and certificates.

I met a lot of supportive faculty members who nurtured me to grow professionally in a very ethical manner.

I enjoyed every moment at the University from campus visit to spending time with the friends. During my classes, all faculty members guided me in a very magnificent manner which impacted me a lot and I started improving day by day.

Jagannath University's Training and placement department is also very cooperative. They provided me ample opportunities to gain lot of internship experiences which helped me to gain practical knowledge in my domain which guided me during my placement journey. I am very grateful to the University that I got placed in TCS. I am so thankful to University for making me an ideal and successful student.

By maintaining a proper perfection between academics and curricular activities I can confidently say that working in a better direction and under the good guidance of teachers made my life better day by day.

Jagannath University taught me to be ready for facing all the challenges that also helped me to achieve more and more in life and have faith in God.

I wanted to conclude through a saying **"Believe in yourself"**.

What the Heart Says...

Till down....throughout my life this heart has many things to say...whether when I was a student or I was a childetc....it brings me down somewhere to narrate its own story.....and I didn't listen to itthinking where this will led me to go....and yes ..today I have an answer. ...to write...

Most of the time we say everything is important but we never give it importance.....until it does come in form of tears....this heart has no meaning in this materialistic world....it has its universe to interact with us.....being part of this ... we do not accept it....heart saysdon't love me...just accept meyes I know ...You can't live herebut at least u can know the demography ofeternity...

I know u believe in reality....practical things..... but something which is not ...practical and can be felt....is me.You don't know my importance but when nobody is with youl am with you... I am an idea which comes to youlater tomorrow...

Dear heart

You have to take pain for long-term peace and that's difficult because you can't handle so-called emotional pain or criticism. No way how things are going to work out you have to be always bold and strong.You know I love you without judging your failures you are going to provide.... but nobody can do anything in this world without proof. I have to take pain to prove my demanding nature in today's world whatever pace it has..... I had to catch up with it... and dear heart please do resonate with my future goals .. and soul mind so that I can be able to give 100 to demands of situation.

वर्ल्ड कप 2011

भारतीय टीम के निताये,
कोहिनून् अ भी प्याये
अठवाग और अचिन तो हैं उनकी जान
धोनी हैं उनका कप्तान।
अशिवन की कैरम गजब है
युवराज सिंह के छक्के।
ठसभजन की गुगली के आगे
दुश्मन के ठक्के-बक्के।
भारत हैं वर्ल्ड कप का हीरो
अभी हैं इसके आगे जीरो।
श्रीलंका की क्या है बिनात
नहीं लगेगा वर्ल्ड कप उनके ठथ।
धोनी ने फिन किन्मत आजमायी
अच्छे-अच्छे को धूल चटायी
अब आया फाइनल का मैच
धोनी-गंभीर की आझेदारी
ठमें जीत के कसीब ले आयी
गंभीर ने किया फिन ठम सबका काम
कर दिया उनका काम तमाम
धोनी-युवराज ने भी बढ़ाया नाज
पठनाया ठमें वर्ल्ड कप विजेता का ताज।

“मन की आवाज़”

मुझे रोको मत,
मुझे टोको मत,

मुझे जीने दो, जीने दो।

ज्वाला की तरह मुझे जल जाने दो,
थोड़ा डर से उबर जाने दो।

बाज़ के पंखों की तरह मुझे उड़ने दो,
थोड़ा साहस तो जुटाने दो।

स्कूल जाकर मुझे सपनों में जीने दो,
थोड़ी हिम्मत तो जुटाने दो।

ख्वाबों पर मुझे काम करने दो,
मुझे कुछ बन जाने दो।

हाथों में तिरंगा मुझे उठाने दो,
देश का नाम मुझे रोशन करने जाने दो।

कल रहूँ या ना रहूँ,
आज ही मुझे कुछ कर जाने दो।

मुझे रोको मत,
मुझे टोको मत,

मुझे जीने दो, जीने दो मुझे।

The Artist

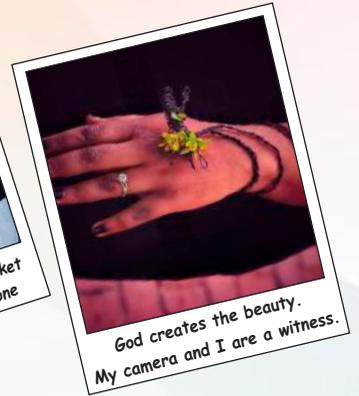

*The Artist Views scenes in black and white,
But sees them in Shades between, in a
language she creates herself,
with an emotion unseen.*

*Unsaid, unheard,
But the Artist sees them all, She sees
though deception,
No Matter how strong the wall.*

*With strokes on her canvas, She creates
hues of beauty
For the artist Views Scenes in a Black and
White,
But Sees them in Shades between.....*
